Explanation of tables.....	36-40
TABLE I.—Retail prices of the principal articles of food on the 15th of each month, July and August, 1911, and July and August, 1912, by cities and by firms.....	41-113
TABLE II.—Bread weights: Scaling weight (weight of dough before baking), in ounces, of the principal brands of wheat bread on the 15th of each month, July and August, 1911, and July and August, 1912, by cities and by firms and brands.....	114-123
TABLE III.—Per cent of increase or decrease in retail prices of the principal articles of food: Price on the 15th of July and August, 1912, compared with price on the corresponding date in 1911, by cities and by articles..	124-130
TABLE IV.—Relative retail prices of the principal articles of food, January, 1911, to August, 1912, by geographical divisions.....	131-138
TABLE V.—Retail prices of coal, for household use, on July 15, 1911, and July 15, 1912, by cities and by firms.....	139-154

BULLETIN OF THE UNITED STATES BUREAU OF LABOR.

WHOLE NO. 108.

WASHINGTON.

OCTOBER 1, 1912.

RETAIL PRICES, 1890 TO AUGUST, 1912.

PREPARED UNDER THE DIRECTION OF FRED C. CROXTON.

INTRODUCTION.

This report presents for each of 39 of the most important industrial cities in the various sections of the United States the retail prices of the principal articles of food, the weight of principal brands of baker's bread, the retail prices of anthracite and bituminous coal for household use, and the net price of gas for household use.

This report summarizes data published in previous retail price reports of the Bureau of Labor¹ and thus furnishes a comparison of retail prices of food from 1890 to August, 1912. Actual retail prices of the principal articles of food and actual bread weights are shown in this report for July 15 and August 15, 1912, and for purposes of comparison for corresponding dates in 1911. Actual retail prices of coal for household use are shown for July 15, 1912, and for the corresponding date in 1911. Actual prices of gas for household use are shown for April 15, 1912, and for the corresponding date in 1911.

Prompt cooperation on the part of retail merchants, bakery officials, coal dealers, and officials of gas companies has made it possible for the Bureau to issue this report showing practically current prices throughout the United States. Data are furnished to the Bureau by 668 retail stores, 142 bakeries, 163 retail coal dealers, and 64 gas companies.

The 39 cities included in this report are important industrial cities representing 32 States. In a general way the city selected in each section of the country was the city having the largest population in that section; but, in addition, two smaller cities were included—Fall River, which is a textile center in Massachusetts, and Scranton, which is situated in the anthracite coal region of Pennsylvania. Within the 39 cities live one-fifth of the total number of people, two-fifths of the urban population, and approximately one-third of the total number engaged in gainful occupations (not including those in agricultural pursuits) in continental United States.

The grade of articles of food quoted is that sold in each city in stores patronized largely by families of American, English, Irish, German, and Scandinavian wage earners. The Bureau has not

¹ Eighteenth Annual Report and Bulletin Nos. 59, 65, 71, 77, 105, and 106.

attempted to quote prices for an article of identical grade throughout the 39 cities. For almost every article this would be absolutely impossible, as the grade varies not only from city to city but also from firm to firm within the same city, and the grade varies to some extent from month to month even within the same store. Stores which vary in a marked degree from day to day or month to month the grade of articles handled have not been included, but in every store there is necessarily some variation in grade.

FOOD.

Fifteen articles of food enter into the relative prices in this report. These 15 articles represent approximately two-thirds of the expenditure for food by the average workingman's family, as shown in the Eighteenth Annual Report of the Commissioner of Labor. Eleven of these 15 articles were higher in price on August 15, 1912, than on December 15, 1911. The only 4 articles (of the 15) lower in price were eggs, butter, potatoes, and sugar, and the prices of 3 of these 4 are normally lower during the summer months than during the winter months.

Thirteen of the 15 articles were higher in price on August 15, 1912, than on August 15, 1911. Potatoes and sugar were the only articles showing a decline in price, and the change was 26.1 and 7.7 per cent, respectively. The per cent of advance varied from 0.1 per cent for bacon to 20.8 per cent for round steak. Seven of the 15 articles advanced more than 10 per cent.

The table which follows compares for each of the 15 articles the price on August 15, 1912, with the price on August 15, 1911.

PER CENT OF INCREASE OR DECREASE IN THE RETAIL PRICES OF THE PRINCIPAL ARTICLES OF FOOD: PRICE ON AUGUST 15, 1912, COMPARED WITH PRICE ON AUGUST 15, 1911, BY ARTICLES.

Article.	Per cent of increase in price.	Per cent of decrease in price.
Potatoes, Irish.....		26.1
Sugar, granulated.....		7.7
Bacon, smoked.....	0.1	
Ham, smoked.....	.7	
Milk, fresh.....	3.6	
Hens.....	6.1	
Butter, creamery.....	6.2	
Flour, wheat.....	6.9	
Corn meal.....	10.6	
Eggs, strictly fresh.....	11.1	
Lard, pure.....	12.4	
Pork chops.....	13.7	
Rib roast.....	17.8	
Sirloin steak.....	18.5	
Round steak.....	20.8	

The next table compares for each of the 15 articles the price on July 15 and August 15, 1912, with the price on the corresponding date in 1911. Of the 15 articles of food the prices of 13 were higher on July 15, 1912, than on July 15, 1911, and as stated above the prices of 13 were higher on August 15, 1912, than on August 15, 1911.

PER CENT OF INCREASE OR DECREASE IN RETAIL PRICES OF THE PRINCIPAL ARTICLES OF FOOD: PRICE ON JULY 15 AND AUGUST 15, 1912, COMPARED WITH PRICE ON THE CORRESPONDING DATE OF 1911, BY ARTICLES.

Article.	Price July 15, 1912—		Price August 15, 1912—	
	Higher than July 15, 1911.	Lower than July 15, 1911.	Higher than Au- gust 15, 1911.	Lower than Au- gust 15, 1911.
	<i>Per cent.</i>	<i>Per cent.</i>	<i>Per cent.</i>	<i>Per cent.</i>
Sirloin steak.....	17.3	18.5
Round steak.....	19.1	20.8
Rib roast.....	17.2	17.8
Pork chops.....	10.2	13.7
Bacon, smoked.....	0.9	.1
Ham, smoked.....	1.07
Lard, pure.....	12.0	12.4
Hens.....	3.9	6.1
Flour, wheat.....	10.0	6.9
Corn meal.....	11.4	10.6
Eggs, strictly fresh.....	11.0	11.1
Butter, creamery.....	11.3	6.2
Potatoes, Irish.....	31.6	26.1
Sugar, granulated.....	1.2	7.7
Milk, fresh.....	2.5	3.6

The next table compares for each of the 15 articles the price on August 15, 1912, with the average price for the 10-year period, 1890 to 1899. Sugar made the least change and pork chops made the greatest change, with advances of 6.1 per cent and 105.4 per cent, respectively. Nine of the 15 articles advanced in price more than 50 per cent.

PER CENT OF INCREASE IN THE RETAIL PRICES OF THE PRINCIPAL ARTICLES OF FOOD: PRICE ON AUGUST 15, 1912, COMPARED WITH THE AVERAGE PRICE FOR THE 10-YEAR PERIOD, 1890 TO 1899, BY ARTICLES.

Article.	Per cent of increase in price.
Sugar, granulated.....	6.1
Butter, creamery.....	34.0
Milk, fresh	35.2
Flour, wheat.....	35.4
Potatoes, Irish.....	46.0
Eggs, strictly fresh.....	47.8
Lard, pure.....	57.1
Hens.....	59.3
Sirloin steak.....	62.7
Ham, smoked.....	63.4
Rib roast.....	63.6
Corn meal.....	64.4
Round steak.....	86.9
Bacon, smoked.....	100.3
Pork chops.....	105.4

The next table compares, for each of the principal articles of food, the retail price on August 15, 1912, with the price on August 15, 1911, within each of the 39 cities and also within each geographical division.

The table shows, for example, that in Boston, Mass., prices on August 15, 1912, compared with prices on August 15, 1911, advanced 24.6 per cent for sirloin steak, 22.4 per cent for round steak, 25.5 per cent for rib roast, 4.6 per cent for pork chops, and declined 8.2 per cent for bacon, etc. The table also shows that prices for sirloin steak on August 15, 1912, compared with prices on August 15, 1911, advanced 24.6 per cent in Boston, 19.9 per cent in Buffalo, 8.7 per cent in Atlanta, 19.8 per cent in Chicago, and 14.6 per cent in Birmingham, etc.

PER CENT OF INCREASE OR DECREASE IN RETAIL PRICES OF THE PRINCIPAL ARTICLES OF FOOD: PRICE ON AUGUST 15, 1912, COMPARED WITH PRICE ON AUGUST 15, 1911, BY CITIES AND GEOGRAPHICAL DIVISIONS.

City and geographical division.	Sirloin steak: Price Aug. 15, 1912—		Round steak: Price Aug. 15, 1912—		Rib roast: Price Aug. 15, 1912—		Pork chops: Price Aug. 15, 1912—	
	Higher than Aug. 15, 1911.	Lower than Aug. 15, 1911.	Higher than Aug. 15, 1911.	Lower than Aug. 15, 1911.	Higher than Aug. 15, 1911.	Lower than Aug. 15, 1911.	Higher than Aug. 15, 1911.	Lower than Aug. 15, 1911.

¹ No change.

² No data.

In order that the course of prices of each of the various articles through a series of years may be studied, relative prices have been computed for each of 15 articles included in this investigation. These relative prices have also been combined so that the course of prices as a whole may be seen. No relative prices were computed for three articles for which actual prices are quoted in General Table I of this report. These articles are chuck roast, leg of lamb (yearling), and storage eggs; and the reasons for their omission from the table of relative prices are shown in connection with the explanation of General Table III of this report.

A relative price, or index number, as it is technically called, of any article is the per cent which the price of that article at any certain date is of the price of the same article at a date or period which has been selected as the base or standard. The value of the relative price is that it enables the reader to follow more readily the course of prices of a single article and, when these relative prices, or index numbers, are combined, also to follow the course of prices of groups of articles. The base selected for the compilation of retail prices of food in this report is the average price for the 10-year period, 1890 to 1899. This base period is the same as was used by the Bureau in previous reports on retail prices (Eighteenth Annual Report and Bulletin Nos. 59, 65, 71, 77, 105, and 106); in reports on wholesale prices (Bulletin Nos. 39, 45, 51, 57, 63, 69, 75, 81, 87, 93, and 99); and in reports on wages and hours of labor (Nineteenth Annual Report and Bulletin Nos. 59, 65, 71, and 77). The average for the 10-year period is used as the base for the reason that an average price for a number of years more nearly represents normal conditions than does the price for a single year, because of unusual conditions which may prevail in any one year.

The next table shows for each of the five geographical divisions and for the United States as a whole the relative retail prices of food for each year from 1890 to 1911 and also for each month from January, 1911, to August, 1912. In the first section of the table is shown for each of the five geographical divisions and for the United States as a whole the simple average of the relative prices of the 15 articles. In computing the relative prices shown in the second section of the table for each of the five geographical divisions and for the United States the relative price for each of the 15 articles was weighted according to average consumption in workingmen's families in the particular division or in the United States as a whole. The method of weighting relative prices is fully explained and illustrated in the report on retail prices published in Bulletin 105, Part I (pp. 33 to 35). The 15 articles represent approximately two-thirds of the average expenditure for food in workingmen's families, according to the Eighteenth Annual Report of the Commissioner of Labor. The

percentage of total expenditures represented by the 15 articles in each geographical division and in the United States as a whole, as shown by the Eighteenth Annual Report, was as follows:

North Atlantic division.....	64.11
South Atlantic division.....	66.43
North Central division.....	63.10
South Central division.....	67.95
Western division.....	57.79
United States.....	63.97

The table of simple and weighted relative prices follows:

RELATIVE RETAIL PRICES OF FOOD: SIMPLE AND WEIGHTED AVERAGES, 1890 TO AUGUST, 1912, BY GEOGRAPHICAL DIVISIONS.

[Average price for 1890-1899=100.0. The relatives prices shown in this report for 1890 to 1907 do not exactly agree with those shown in Bulletin 77 for the reason that a smaller number of cities and a smaller number of articles are included.]

Year or month.	Simple average of the relative prices of 15 principal articles, shown in detail on pages 18 and 19.						Relative prices weighted according to the average consumption of the various articles of food in workingmen's families in each geographical division.

The last column of the above table shows that the relative price computed by giving to each of the articles its weight according to average consumption in workingmen's families was in 1890, 101.9 per cent of the average price for the 10-year period 1890 to 1899. In 1891 prices advanced to 103.4, in 1892 there was a slight decline to 101.6, in 1893 an advance to 104.1. After this there was a gradual decline until the lowest price (95.2) in the 22 years and 8 months covered by this report was reached in 1896. From that time each year showed an advance until the highest yearly price (144.1) in the 22 years and 8 months was reached in 1910. The price (143.0) in 1911 showed a slight decline from 1910, but was higher than in any year from 1890 to 1909. The monthly relative price in January, 1911, was 145.0. There was a decline until 135.3 was reached in April; then an advance each month until January, 1912, when the relative price was 153.5; a decline during each of the next two months; then an advance until 154.6 was reached in May, then a slight decline to 154.0 in June, a further decline to 151.8 in July, and then an advance to 153.8 in August, 1912.

The column of the above table which gives for the United States the relative price computed as a simple average of the 15 principal articles of food shows that the course of the simple average yearly prices is exactly the same as the course of the weighted, but the simple relative goes lower during the period of low prices and higher during the period of high prices.

The lowest price during the 22 years and 8 months was reached in each of the geographical divisions and in the United States as a whole in 1896, both for the simple averages and for the weighted averages. In the North Atlantic division prices reached the highest level in August, 1912, according to the simple average and also when the price of each of the various articles is weighted according to consumption in the average workingman's family. In the South Atlantic division prices (both simple and weighted averages) reached the highest level in May, 1912. In the North Central division the highest level was reached in June, 1912, according to the simple average and in May, 1912, according to the weighted average. In the South Central division prices (both simple and weighted averages) reached the highest level in May, 1912. In the Western division the highest level was reached in May, 1912, according to the simple average, and in November, 1911, according to the weighted average. In the United States considered as a whole the highest level was reached in June, 1912, according to the simple average and in May, 1912, according to the weighted average.

Considering prices in the United States as a whole, the simple average of the relative prices for 15 principal articles of food shows the following:

Jan. 15, 1912, compared with Jan. 15, 1911.....	3.7 per cent advance
Feb. 15, 1912, compared with Feb. 15, 1911.....	5.3 per cent advance.
Mar. 15, 1912, compared with Mar. 15, 1911.....	5.8 per cent advance.
Apr. 15, 1912, compared with Apr. 15, 1911.....	11.0 per cent advance.
May 15, 1912, compared with May 15, 1911.....	12.6 per cent advance.
June 15, 1912, compared with June 15, 1911.....	9.2 per cent advance.
July 15, 1912, compared with July 15, 1911.....	4.6 per cent advance.
Aug. 15, 1912, compared with Aug. 15, 1911.....	5.6 per cent advance.

When the relative prices are weighted according to the average consumption of the various articles of food in workingmen's families the changes in prices within a year were as follows:

Jan. 15, 1912, compared with Jan. 15, 1911.....	5.9 per cent advance.
Feb. 15, 1912, compared with Feb. 15, 1911.....	7.5 per cent advance.
Mar. 15, 1912, compared with Mar. 15, 1911.....	7.3 per cent advance.
Apr. 15, 1912, compared with Apr. 15, 1911.....	12.9 per cent advance.
May 15, 1912, compared with May 15, 1911.....	14.2 per cent advance.
June 15, 1912, compared with June 15, 1911.....	10.6 per cent advance.
July 15, 1912, compared with July 15, 1911.....	5.6 per cent advance.
Aug. 15, 1912, compared with Aug. 15, 1911.....	6.4 per cent advance.

The next table compares prices in each geographical division and in the United States as a whole on July 15, 1912, and on August 15, 1912, with prices on the corresponding dates in 1911. A corresponding table in Bulletin 106 showed similar data for January to June.

PER CENT OF INCREASE OR DECREASE IN RETAIL PRICES OF ALL ARTICLES OF FOOD FOR WHICH DATA ARE SHOWN IN THIS REPORT: PRICE ON JULY 15 AND AUGUST 15, 1912, COMPARED WITH PRICE ON THE CORRESPONDING DATE IN 1911, SIMPLE AND WEIGHTED AVERAGES, BY GEOGRAPHICAL DIVISIONS.

Geographical division.	Price July 15, 1912—		Price Aug. 15, 1912—	
	Higher than July 15, 1911.	Lower than July 15, 1911.	Higher than Aug. 15, 1911.	Lower than Aug. 15, 1911.
Simple averages of the relative prices of 15 principal articles, shown in detail on pages 18 and 19:	<i>Per cent.</i>	<i>Per cent.</i>	<i>Per cent.</i>	<i>Per cent.</i>
North Atlantic.....	6.6	7.4
South Atlantic.....	3.9	4.4
North Central.....	4.9	7.0
South Central.....	2.2	2.8
Western.....	2.2	3.3
United States.....	4.6	5.6
Relative prices weighted according to the average consumption of the various articles of food in workingmen's families, in each geographical division:				
North Atlantic.....	8.4	9.1
South Atlantic.....	5.2	5.1
North Central.....	5.7	7.4
South Central.....	2.4	2.8
Western.....	4.2	4.6
United States.....	5.6	6.4

The relative retail prices in the United States, considered as a whole, of each of the 15 principal articles of food for the 22 years and 8 months, 1890 to August, 1912, are presented in the table which follows. General Table IV of this report shows similar data for each of the five geographical divisions for the period from January, 1911, to August, 1912, and General Table II, in Bulletin 105, shows similar data for each of the five geographical divisions for the 22 years, 1890 to 1911. The table shows yearly prices for 1890 to 1911, and prices each month from January, 1911, to August, 1912.

RELATIVE RETAIL PRICES OF THE PRINCIPAL ARTICLES OF FOOD

157.1	159.3	135.4	164.4	147.8	134.0	146.0	106.1	135.2

In the above table, as in the preceding table of relative prices, the average price for the 10-year period, 1890 to 1899, is the base, or 100. The figures in the column for round steak, for example, indicate that if the price of round steak for the 10-year period 1890 to 1899 be considered 100, the price in 1890 was 97.6, or 2.4 per cent below the average for 1890 to 1899; the price in 1900 was 109.8, or 9.8 per cent above the average for 1890 to 1899; the price on August 15, 1912, was 186.9, or 86.9 per cent above the average price for 1890 to 1899, etc.

In connection with the price quotations furnished the Bureau of Labor each month, the retail merchants are invited to state "the cause of any material advance or decline in the price of any article since the middle of last month." A few of the statements of the opinions of the retail merchants accompanying their July price reports follow. The name of the city but not of the dealer is shown.

CHARLESTON.—City cattle still short; no stall-fed on market; all grassers.

CHICAGO.—Butter some lower, account seasonable weather. New potatoes lower, account supply. Old potatoes about exhausted.

DETROIT.—Do not look for much higher prices at present, but will remind you that there is an undersupply of live stock. Demand is greater than receipts.

FALL RIVER.—There is a shortage of milk here on account of severe dry weather.

FALL RIVER.—The price of light beef has dropped and the retail price of this class of beef will be about normal this week. Mutton is lower. We have sold very little beef during the high prices.

INDIANAPOLIS.—The milk supply is very short. Intense heat is bringing the milk in in a high state of acidity.

INDIANAPOLIS.—The outlook for potatoes is favorable, which has forced potatoes down 25 cents on the peck in the last month.

KANSAS CITY.—Hens are higher, farmers too busy with crops to bother with shipping them.

LOUISVILLE.—Drop in potatoes due to heavy new crop.

MANCHESTER.—Milk 7 cents up until July 16, 8 cents after 16th. New laws cause of raise.

NEW YORK (BROOKLYN).—Business very dull; our people are using very little meat. We have lost about \$100 this past month. Meat is too high for our neighborhood. Hope there will come a change soon.

ST. LOUIS.—Decline in potatoes. Advance on all meats in the wholesale way.

SALT LAKE CITY.—Fresh eggs higher. Smoked meats all on advance. Flour trifle lower as harvest time approaches. New potatoes also on the decline.

A few of the remarks accompanying the price reports for August 15 follow:

CHICAGO.—The advance on sirloin steak, round steak, rib roast, and chuck roast is occasioned by the high price of cattle. Cattle are very scarce, a shortage of 35 per cent over last year. Hogs are going higher every day, consequently hams, bacon, and pork loins must bring more money. We have a shortage of cattle in this country which will never be made up. In fact, I personally feel it will get worse. Inside of three years beef will be too high for the laboring man to eat oftener than once a week. The hog condition does not look pleasing. There seems to be a shortage. The farmer seems to be satisfied to sell his grains and not take a chance on his hogs or cattle which may get sick and die most any time.

CHICAGO.—All grades fresh meats up 1 to 2 cents per pound, account harvesting, and not as many cattle arriving. Pork, both fresh and salt, up 1 to 2 cents. Eggs higher, account molting season. Butter little higher, account storing.

FALL RIVER.—Beef and provisions are high and still going higher; the price on mutton has been reasonable the last month. Garden truck is bringing good prices; the people are all kicking about the high price of beef and are buying very light.

KANSAS CITY.—Farmers are too busy with crops to bother with shipping chickens, hence the high prices.

PORTLAND.—Slow sale of boiling beef is the cause of high-priced round and loin steaks. People must be taught to use more rough meats in my district. I am using two hind quarters to one front quarter of beef.

BREAD WEIGHTS.

This report includes scaling weight (weight of dough before baking), in ounces, on July 15, 1912, and on August 15, 1912, of some 280 principal brands of baker's wheat bread as reported by more than 140 bakers. Reports were secured from a few bakeries showing bread weights on corresponding dates in 1911. Comparisons of weights on August 15, 1912, and on August 15, 1911, are available for 52 brands, and of that number the weight of 4 brands was heavier on August 15, 1912, than on the corresponding date in 1911, the weight of 24 brands was unchanged, and the weight of 24 brands was lighter.

The weights of wheat bread shown in General Table II of this report were reported from representative bakeries in each city. In order to avoid identification, names of firms and brands are not disclosed, but each firm has been given a number and each brand reported by a firm has been designated by a letter.

A few of the remarks accompanying the bakers' reports of bread weights on August 15 follows:

PORTLAND.—Increase in weight of bread due to new flour contracts at less money.

RICHMOND.—Still working on flour that cost \$5.45 per barrel.

DENVER.—On account of slight change in mixture loaf retains its moisture better and can get weight by scaling one-half ounce less.

COAL.

Comparing retail prices of coal in ton lots, for household use, on July 15, 1912, with prices on July 15, 1911, the average advance for 30 cities on Pennsylvania anthracite white ash, stove size, was 4.5 per cent; the average advance for 29 cities on Pennsylvania anthracite white ash, chestnut size, was 5 per cent; and the average advance for 32 cities on bituminous was 1.7 per cent.

The table which follows compares, for each of the cities for which data were secured, prices on July 15, 1912, with prices on July 15, 1911. Three descriptions of coal are included—Pennsylvania anthracite white ash, stove size; Pennsylvania anthracite white ash, chestnut size; and bituminous. The comparisons are of coal for

household use and sold in ton lots. General Table V of this report shows actual prices of the three descriptions of coal above named, in ton lots, in half-ton lots, and in lots of less than one-fourth ton.

The price on July 15, 1912, as compared with the price on July 15, 1911, was higher for Pennsylvania anthracite, stove size, in 28 out of 30 cities from which reports were secured, and there was no change in price in the remaining 2 cities. During the same period, Pennsylvania anthracite, chestnut size, advanced in 27 out of 29 cities and the price remained unchanged in 2 cities; bituminous advanced in 16 out of 32 cities, and the price remained unchanged in 7 cities and declined in 9 cities.

In the North Atlantic division Pennsylvania anthracite white ash coal, stove size, was 5.4 per cent higher on July 15, 1912, than on July 15, 1911; Pennsylvania anthracite white ash, chestnut size, was 5.8 per cent higher; and bituminous was 3.7 per cent higher.

¹ No change.

Data showing retail prices of coal prior to 1907 have not been collected by the Bureau of Labor, and therefore a summary for the period for which food prices are summarized in this report is impossible.

The table which follows shows the relative prices of coal in each of the five geographical divisions and in the United States as a whole, each year from 1907 to 1911. The first section of the table compares the average price for each year, 1908 to 1911, inclusive, with the average price for 1907. The second section compares the midwinter price on January 15 of each year, 1908 to 1911, inclusive, with the price on January 15, 1907.

RELATIVE RETAIL PRICES OF COAL IN TON LOTS, FOR HOUSEHOLD USE, 1907 TO 1911, BY GEOGRAPHICAL DIVISIONS.

Average price for 1907=100.0.

In the above table the relatives for each geographical division were computed simply by dividing the sum of the relatives for the several cities for which coal prices were quoted by the number of cities included. The United States relatives were computed by dividing the sum of the relatives for all cities included by the number of such cities.

GAS.

The price of gas will be secured by the Bureau semiannually, on April 15 and October 15. The last quotations secured are for April 15, 1912. These prices are shown in Bulletin No. 106, Part I, but are repeated here for ready reference. Quotations from one additional firm are added.

Net prices for gas for household use are shown in this report for April 15, 1912, and for purposes of comparison prices on April 15, 1911, are also given. Prices are reported for manufactured gas from 54 companies in 36 cities; for natural gas from 10 companies in 6 cities; and for mixed manufactured and natural gas from 1 company.

Only 9 companies reported any change in price on April 15, 1912, as compared with April 15, 1911. Eight companies supplying manufactured gas reduced prices and 1 company supplying natural gas increased prices as follows:

Boston, Mass.:

Company C, reduced price from \$0.90 to \$0.85.

Washington, D. C.:

Company B, reduced price from \$1 to \$0.85.

Chicago, Ill.:

Price reduced from \$0.85 to \$0.80.

Detroit, Mich.:

Company A, reduced price from \$0.80 to \$0.75.

Milwaukee, Wis.:

Price reduced from \$0.80 to \$0.75.

New Orleans, La.:

Price reduced from \$1.15 to \$1.10.

Denver, Colo.:

Price reduced from \$0.90 to \$0.85.

San Francisco, Cal.:

Price reduced from \$0.92½ (rate fixed by court in adjudication of injunction) to \$0.80.

Kansas City, Mo.:

Natural gas price increased from \$0.25 to \$0.27.

The net price per 1,000 cubic feet charged on April 15, 1911, and on April 15, 1912, by each of the companies reporting is shown in the table which follows.

NET PRICE, PER 1,000 CUBIC FEET, OF GAS, FOR HOUSEHOLD USE, ON APRIL 15, 1911,
AND ON APRIL 15, 1912, BY CITIES AND BY COMPANIES.

³ For cooking and heating purposes only.

⁴ Manufactured gas distributed prior to July, 1911.

Data showing the price of gas prior to 1907 have not been collected by the Bureau of Labor. A comparison of the prices of manufactured gas as reported by 50 companies on April 15, 1907, and on April 15, 1912, shows that during the 5-year period 23 companies reduced prices and 27 companies made no change. Of the eight companies reporting the price of natural gas on April 15, 1907, and on April 15, 1912, one reduced prices, two made no change, and five advanced prices.

EXPLANATION OF SCOPE AND METHOD.

This report, as already stated, presents for each of 39 of the most important industrial cities in the various sections of the United States, the retail prices of the principal articles of food, the weight of the principal brands of wheat bread, the retail prices of anthracite and bituminous coal, and the net price of gas for household use.

The following cities are included:

Atlanta, Ga.
Baltimore, Md.
Birmingham, Ala.
Boston, Mass.
Buffalo, N. Y.
Charleston, S. C.
Chicago, Ill.
Cincinnati, Ohio.
Cleveland, Ohio.
Dallas, Tex.
Denver, Colo.
Detroit, Mich.
Fall River, Mass.
Indianapolis, Ind.
Jacksonville, Fla.
Kansas City, Mo.
Little Rock, Ark.
Los Angeles, Cal.
Louisville, Ky.
Manchester, N. H.

Memphis, Tenn.
Milwaukee, Wis.
Minneapolis, Minn.
Newark, N. J.
New Haven, Conn.
New Orleans, La.
New York, N. Y.
Omaha, Nebr.
Philadelphia, Pa.
Pittsburgh, Pa.
Portland, Oreg.
Providence, R. I.
Richmond, Va.
St. Louis, Mo.
Salt Lake City, Utah.
San Francisco, Cal.
Scranton, Pa.
Seattle, Wash.
Washington, D. C.

FOOD.

The present report gives retail prices of the principal articles of food in 39 industrial cities in the United States for July 15 and August 15, 1912, and for comparative purposes the price on the corresponding dates of 1911. Summaries are also presented covering the 22 years and 8 months from 1890 to August, 1912, inclusive. Previous investigations of retail prices have been made and published by the Bureau of Labor, as follows: Eighteenth Annual Report, covering 1890 to 1903; Bulletin No. 59 (July, 1905), covering 1904; Bulletin No. 65 (July, 1906), covering 1905; Bulletin No. 71 (July, 1907), covering 1906; Bulletin No. 77 (July, 1908), covering 1907; Bulletin No. 105 (August, 1912), covering 1907 to 1911; Bulletin No. 106 (August, 1912), covering January to June, 1912.

The retail dealers who kindly furnished information for this report were selected through personal visits of agents of the Bureau of Labor and are those selling largely to the families of American, English, Irish, German, and Scandinavian wage earners. Practically all of the stores included are neighborhood stores, as such stores more nearly represent the trade of workingmen's families. A comparatively few "down-town" stores are included. "Chain stores" (a number of stores in one city owned or controlled by one firm) are not included, except in a very few cities where such stores are so numerous that they form a very important factor in the city's trade. So-called "cut-rate" stores are not included. The stores selected, with a very few exceptions, deliver all purchases when requested.

After the agent of the Bureau had selected a store, arrangements were made for the retail merchant to send to the Bureau a statement of prices of the various commodities on or about the 15th of each succeeding month. Return visits to the various firms are made by agents of the Bureau whenever it is necessary to make personal inquiries concerning the monthly price quotations.

GENERAL DESCRIPTION OF ARTICLES INCLUDED.

The grade of articles quoted is that sold in each city in stores patronized largely by the families of American, English, Irish, German, and Scandinavian wage earners.

The Bureau has not attempted to quote prices for an article of identical grade throughout the 39 cities. For almost every article this would be absolutely impossible as the grade varies not only from city to city but also from firm to firm within the same city, and the grade even varies to some extent from month to month within the same stores. Stores which vary in a marked degree from day to day or month to month the grade of articles handled have not been included, but in every store there is necessarily some variations in

grade. This variation is usually more marked in fresh meat and eggs than in other articles.

Brief descriptions of each of the articles and necessary explanations concerning the article are here presented.

Fresh beef.

In the present report prices are quoted for four cuts of beef, as follows: Sirloin steak, round steak, rib roast, and chuck roast.

Methods of cutting beef vary considerably in different cities and to some extent this affects retail prices.

The majority of the firms that furnished quotations for cuts of meat quoted in this report buy "straight cattle" or carcass beef; that is, whole carcass separated into sides (halves) as distinguished from special cuts, such as loins, ribs, or rounds. A side or half consists of a hind quarter and a forequarter. In separating a side or half into quarters no ribs are cut to the hind quarter in some cities, while in other cities the side is cut leaving 1, 2, 3, or 4 ribs on the hind quarter. These ribs are sold either as roast or porterhouse steak. If sold as steak the rib is usually removed before weighing.

The hind quarter is separated into "loin" and "round" either by cutting from the top of the hip near the end of the backbone through the rump to the hip joint and then through to the front of the leg above the stifle joint or by cutting from the leg at the stifle joint along the leg bone to the hip joint and then through the rump to the top of the hip at or near the tail bone. The second method gives a larger loin and a smaller round than does the first method.

The loin of beef is cut into steaks. The cuts commonly known as "sirloin" steak for which prices are quoted in most cities are cut parallel to the full cut surface of the thick or butt end of the loin, and include all cuts of the loin with any part of the hip bone in them. The other cuts of the loin, or those from the small or thin end, are commonly known as "porterhouse" steak in most cities.

Emphasis should be placed upon the fact that, according to the method of cutting followed in Boston, Mass., Manchester, N. H., Philadelphia, Pa., and Providence, R. I., no cut corresponds to the cut known as sirloin in other cities. In these four cities the cut known as sirloin corresponds to the cut described above as porterhouse, and in this report the quotations of prices for the cities just named are for the cut known locally as sirloin. The cut commonly known as sirloin is sold in Fall River, Mass., under the name of "rump" steak, and in this report the prices quoted for that city are for the article known locally as "rump" steak.

The round of beef is separated at the hip joint into the rump and the round. The rump has part of the hip bone in it and is called rump, bouillon, or butchers' roast.

The round has the leg bone in it. The great majority of the prices quoted for round steak are for "whole" round; that is, for a cut that includes the top round, bottom round, and bone. Quotations from a few firms are for "top round, bone out," or "top round, bone in." Top round is cut from the inside of the leg or round and extends about half through the round to the leg bone, and to the tissue or membrane which marks the natural division between the inside and outside of the leg. The inside is tender while the outside is muscular and more or less tough. Some firms cut the top round to include the leg bone and a small part of the bottom round. Firms that sell top round usually sell the bottom or outside for pot roast or Hamburg steak.

In many cities no bone or fat is trimmed from either sirloin or round steak before weighing, while in others some bone and fat or all bone and fat are cut off before steaks are weighed.

Forequarters include ribs, chucks, plates, and shanks. The shank is removed by cutting through the shoulder joint or by sawing through the leg bone below the shoulder joint. The plate is separated from the ribs and chuck by cutting through the ribs on a line beginning about the middle of the rib next to the hind quarter and running parallel to the backbone to the point where the shank is removed. If the line or cut be nearer the backbone, the ribs are short, more desirable, and higher priced.

"Ribs" are usually separated from chucks by cutting across the backbone between the fifth and sixth ribs, counting from the front backwards. "Ribs" usually include about eight ribs, two of which have part of the shoulder blade in them.

The prices quoted for ribroast are for cuts of ribs that do not have any part of the shoulder blade in them. Some firms in some cities cut ribroast short and trim off part of the chine bone before weighing.

Chucks extend from the point where ribs and chucks are separated to the neck. Chuck roast as quoted in this report includes five ribs and part of the shoulder blade. The prices quoted are for the best cut, which is next to the butt end of the ribs. No relative prices have been computed for chuck roast.

Plates include the forequarter flank or navel and the brisket. The flank or the navel extends from about the eighth rib to the hind-quarter flank, and the brisket extends from about the eighth to the first rib and includes all the breastbone.

All quotations for fresh beef in this report are on the basis of one pound, but of course in many, if not most, cases the usual sale is in quantities of more than 1 pound.

As stated elsewhere, the grade of beef quoted is not identical throughout the 39 cities, nor is the grade identical in a store throughout the period for which prices are quoted, but the article quoted is

the best grade of meat on sale at the date of each quotation in the store selected, and the stores selected were those patronized largely by the families of American, English, Irish, German, and Scandinavian wage earners.

Pork chops.

The quotations are for loin chops, with the exception of a very few for rib chops.

Prices are quoted on the pound basis, but many of the sales are for quantities larger than 1 pound.

Bacon.

Prices are reported by each dealer on the best grade of smoked bacon that he sells in any considerable quantity to families of wage earners.

No fancy bacon ready sliced in glass jars or other small packages is quoted.

The prices quoted are in most cases for bacon sliced when sold, but in a few cities some of the dealers sell relatively little sliced bacon and therefore have quoted bacon by the piece and have reported the usual range of weight of such pieces.

Prices are quoted on the pound basis, but many sales are of quantities larger than a pound.

Ham.

Prices are reported by each dealer on the best grade of smoked ham that he sells in any considerable quantity to families of wage earners.

The prices quoted are in most cases for ham sliced when sold, but in a few cities some of the dealers sell relatively little sliced ham and therefore have quoted whole hams and have reported the usual range of weight of such hams.

Some of the firms that sell sliced ham cut only four or five slices from the middle of the ham and sell the ends without slicing. On the other hand, some dealers slice practically all the ham and in such cases the prices quoted are for the best slices from the middle of the ham.

Prices are quoted on the pound basis, but in many, if not most, cases the usual quantity sold is greater than 1 pound.

Lard.

All quotations are for "pure" lard with the exception of a few for "pure leaf." No "compound" lard is quoted. The great majority of quotations are for "tub" lard (lard sold in bulk). Some quotations, however, are for lard in pails weighing either 3 or 5 pounds and known to the trade in some localities as No. 3 and No. 5. Tub lard is quoted by the pound. In many cases tub lard is customarily sold

in quantities of 2 or more pounds, and in all such cases the price quoted in this report is reduced to the pound basis. Where lard is sold by the pail, the price is quoted per pail, gross weight, as it was not possible readily to determine the net weight of the lard.

Leg of lamb, yearling.

The prices quoted in this report are for the article generally known to the trade as "yearling." The age of the sheep ("yearling") varies from approximately 9 to 18 months. Owing to the fact that, in some firms, the age varies considerably with different seasons of the year, no "relative" prices are computed for this article in the report of the Bureau.

Hens.

Prices are quoted for "hens" at least a year old, such as are usually sold for roasting or stewing. In some localities the term used for these hens is either "fowls" or "stewing chickens."

The quotations are in most cases for "dressed" hens, although a few dealers reported prices for "live" hens. Dressed hens are described as "drawn" or "not drawn." In a few cities hens are sold "full dressed"; that is, drawn and with head and feet off.

Throughout all cities reporting, except San Francisco, the basis of sale is 1 pound. In San Francisco hens are sold wholesale in 1-dozen lots and classified under the terms "small," "large," and "extra." Retailers while following this classification seldom weigh the hens, but sell by the fowl and base the price charged on size and appearance, while at the same time having in mind a rough estimate of the value per pound.

Flour, wheat.

Flour is quoted by the eighth-barrel bag for about 30 of the cities, by the eighth-barrel bag with a few firms quoting fourth-barrel bags in a few cities, by the fourth-barrel bag with an occasional firm quoting half-barrel bags for some of the Pacific coast cities, by the 20-pound bag by one firm in Indianapolis, and by the sixteenth-barrel bag from an occasional firm in one or two of the eastern cities. The weight of the various size bags varies slightly in different localities; the half-barrel bag weighs from 96 to 98 pounds, the fourth-barrel bag from 48 to 49 pounds, and the eighth-barrel bag from 23 to 24½ pounds. These weights are in some instances net and in others gross. Great quantities of flour are sold in sixteenth and in thirty-second-barrel bags, particularly in the eastern cities, but the eighth-barrel bag is a very popular size in most of the cities for which prices were secured, and for ready comparison that size has been quoted where possible.

In a few of the cities the price of flour is "protected"; that is, the flour manufacturer fixes a minimum selling price for the retailer.

The quotations from each firm are for a definite brand, or brands of equivalent grade, throughout the period for which prices are quoted, except as indicated. The name of the brand quoted has been entered in connection with the price. Where a merchant has quoted a brand manufactured especially for his trade or which carries his firm name the flour has been entered as "special brand," in order not to disclose the identity of the firm furnishing information to the Bureau.

Corn meal.

The corn meal for which prices are given is bulk or bag meal, and not fancy meal in cartons or packages. The color of the meal handled varies, generally speaking, according to the locality, yellow being sold as a rule in cities of the North, white in southern cities, and both white and yellow in Denver, Salt Lake City, and the cities on the Pacific coast.

The price of corn meal is quoted in this report on a 1-pound basis. These figures have been derived from the price charged by the dealer for the quantity of corn meal most in demand among his customers and represent a great variety of units of sale. In New England and other northern cities the amounts sold are usually small, being as a rule from 2 to 5 pounds, the 5 cents' worth, or the 10 cents' worth. In most southern cities sales of 10 pounds or more predominate, while in the cities of the far West reports on any other unit than 10 pounds are exceptional.

Eggs.

Prices of eggs are reported from grocery stores with the exception of a few instances in which quotations have been secured from dairy firms. The prices quoted are for "strictly fresh" eggs of the highest grade handled by the firm on the date of each quotation, excluding fancy eggs, or eggs selected for size and color. Many of the firms represented in this study carry both fresh and storage eggs whenever both are on the market, and some firms at certain seasons do not carry any "strictly fresh" eggs. The trade terms used to describe the eggs for which quotations are given vary with the locality. On the Atlantic coast, for example, common descriptive terms are "near-by," "State," "eastern," and "western;" in the Middle West, "near-by" and "country;" in certain southern cities, "near-by" and "Tennessee;" and on the Pacific coast, "ranch" and "eastern, fresh."

Some quotations for "storage" eggs were secured for the period 1907 to 1911, but the number was insufficient for purposes of publication. Prices were quoted in Bulletin No. 106, Part II, for storage eggs for the months of January and February, 1912. Some few firms continued to quote storage eggs for the spring and summer

months, but those quotations were not entered in the reports, as it appeared that in some cases, at least, the article quoted as "storage" during the spring months was eggs "iced in transit" and not eggs that had been in storage. No relative prices have been computed for storage eggs.

All prices in the table are quoted on the dozen, and in most cities included in this study the dozen is the only unit of sale of importance. In New York City, however, purchases by the 25 cents' worth are common, and in the Pacific coast cities two dozen becomes at times the prevailing unit of sale, owing to the fact that it is a common practice to make a special rate on this quantity (as for example, 65 cents per 2 dozen when the price is 35 cents per dozen). In such cases the price as quoted on the most usual unit of sale has been reduced to the rate per dozen.

Butter.

The quotations for butter represent the grade of butter known on the market as "creamery extra." No dairy butter nor brands designated as specials or fancy have been included, with but one exception.

Creamery extras are sold in bulk, otherwise known as "tub" butter, or in bricks generally termed "print" butter. When print butter is put up in cartons it is often termed "package" butter.

Prices for butter in practically all cities west of the Mississippi included in this report, except St. Louis and Omaha, are for print butter, and in most cases this print butter is put up in cartons.

The demands for print or tub butter seem to rest on local preferences. In some cities the price is the same for both; in others print butter is quoted at 1 or at 2 cents higher than tub.

In some of the Pacific coast cities butter is usually sold in 2-pound prints, locally known as "squares." Prices for San Francisco are shown in this report on the 2-pound basis; some prices for Portland are on the 2-pound basis and some are on the 1-pound basis; prices for all other cities are on the 1-pound basis. In Seattle butter is reported both in 2-pound prints and in 1-pound prints, and in that city all quotations have been reduced to the 1-pound basis.

Potatoes.

All quotations for potatoes are for the article known in many localities as "Irish" potatoes, which signifies the "white" potato in contradistinction to the "sweet." The extensive variety of Irish potatoes on the market and the fact that retailers do not confine their buying to one variety have made it impracticable to quote varieties or grades.

New potatoes have been quoted only when they form the bulk of the sales. This is usually when new potatoes grown in the locality

are plentiful, as the price of new potatoes shipped from a distance is generally prohibitive to the mass of trade in the stores reporting.

The peck, or a fractional part of a peck, is the unit of sale for practically all eastern cities except New York and Newark. All quotations for the eastern cities in this report are on the basis of 1 peck. In the West potatoes are sold by weight, using the 100-pound lot as a basis. In the western cities reporting there is a demand during the summer for smaller quantities than the 100-pound lot, which results in sales of 25 cents', 50 cents', and one dollar's worth.

No retail prices for Irish potatoes have been tabulated for either New York or Newark owing to the fact that the unit of sale generally reported in each city—that is, the quart and the one-half peck, respectively—does not appear to be based on a definite weight or measure. For example, in New York the amount sold for a quart varies from store to store from $2\frac{1}{2}$ to 4 or more pounds, while within the same store the number of pounds of new potatoes sold for a quart is generally less than the number of pounds of old potatoes sold for a quart.

Sugar.

All quotations are for granulated sugar and are on a pound basis. These prices per pound in most cases have been derived from prices as reported by the dealers on the quantities most in demand. Such quantities vary in the cities represented. The common units of sale in most cities are 25-cent, 50-cent, and \$1 lots. In certain cities, notably New York and Philadelphia, smaller quantities are reported as the usual units of sale.

Milk.

All quotations are by the quart and are for milk regularly delivered to customers.

In connection with each quotation is a statement as to whether the milk is sold bottled or is dipped from the can as sold, and also a statement indicating whether the milk is sold "raw" or "pasteurized."

All quotations are from dairies, either the original producer or a milk dealer, and none are from grocers.

The method of sale is in some cases by the quart, and a bill is rendered monthly for the amount actually served; in other cases a certain number of tickets, each exchangeable for 1 quart of milk, is sold for \$1, usually with a slight gain to the consumer; thus, if milk is 9 cents per quart, 12 tickets may be sold for \$1. Some of the dairies in the Pacific coast cities charge a definite sum monthly for a quart of milk each day, the price being the same for each calendar month.

BREAD WEIGHTS.

The weights of wheat bread, tabulated separately by cities, firms, and brands, are the weights at which the respective breads were

scaled on the 15th of July and of August, 1912, and, where available, corresponding information for the same months of 1911 is shown for comparison. This scaling weight is the weight of the loaf before baking. While it would be highly desirable to present the weight of the loaf as actually purchased by the consumer, the complications involved in the relation of the scaled weight to the weight of the bread when it passes over the retailer's counter were found to be such that it was impossible to do so. The loss of weight in baking varies with the formula, with the style of loaf, and with the temperature of the oven. A further element of uncertainty affecting weights enters before the consumer actually gets the loaf. The weight, of course, varies with the time intervening between the removal of the loaf from the oven and its final distribution to the consumer, the loss by evaporation also being partly determined by the conditions under which the bread is kept and by the state of the atmosphere.

The customary loss in baking is variously estimated by bakers, but it may be said that a loaf scaled at 18 ounces will when sold, if handled under ordinary conditions, weigh not far from 16 ounces, and a loaf scaled at 16 ounces will, when baked and cooled, weigh about $14\frac{1}{2}$ ounces. As noted above, however, the range of loss varies widely.

From general Table II of this report for each city all fancy, special, graham, rye, and restaurant breads are excluded. All wrapped and so-called "French" breads are so designated.

In the use of these data it must be borne clearly in mind that weight is only one factor entering into the bread question as an element in the study of prices. The quality of materials used varies widely and is likely to be reflected in the weight at which the loaf is scaled.

It is hoped that at some future time it may be possible to present baked weights as well as scaled weights; but, as already explained, this was impracticable in the present report.

The most representative bakeries in every city included in this report have promptly furnished to the Bureau of Labor information concerning bread weights on the 15th of each month.

COAL.

This report gives prices of coal on July 15, 1912, and for comparative purposes prices are also entered for the corresponding date in 1911. The prices shown are those quoted for retail trade for household use. The table of prices shows Pennsylvania anthracite white ash coal both in stove size and in chestnut size; bituminous coal of several kinds; and in a few cities other varieties, such as Colorado, Welsh, and Australian. Prices are quoted for sales "in ton lots,"

in "half-ton lots," and "in lots of less than one-fourth ton." The prices were quoted by coal dealers who kindly supplied the information at the request of the Bureau of Labor. In some cities practically all sales for household use were of anthracite coal, and in other cities of bituminous coal. The coal dealers in each city were asked to quote prices on the kind of bituminous coal usually sold for household use. The prices quoted are for coal delivered to consumers, but do not include charges for storing ton or half-ton lots in cellar or coal bin where an extra handling was necessary, except as noted in connection with the price quotation.

GAS.

This report gives prices of gas, for household use, on the 15th of April, 1912, and for purposes of comparison the prices on the corresponding date in 1911 have been entered. The prices quoted are the net rates charged for gas for household use as distinguished from use by manufacturing plants and industrial establishments. The prices are the same for gas for illuminating, cooking, and heating purposes, except as noted in the table. Prices are in most cases for manufactured gas, but natural gas has also been quoted where that is in general use. The data were furnished by the gas companies, who kindly responded to the Bureau's request for this information.

EXPLANATION OF TABLES.

This report includes five general tables, as follows:

Table I.—Retail prices of the principal articles of food on the 15th of each month, July and August, 1911, and July and August, 1912, by cities and by firms.

Table II.—Bread weights: Scaling weight (weight of dough before baking), in ounces, of the principal brands of wheat bread on the 15th of each month, July and August, 1911, and July and August, 1912, by cities and by firms and brands.

Table III.—Per cent of increase or decrease in retail prices of the principal articles of food: Price on the 15th of July and of August, 1912, compared with price on the corresponding date in 1911, by cities and by articles.

Table IV.—Relative retail prices of the principal articles of food, January, 1911, to August, 1912, by geographical divisions.

Table V.—Retail prices of coal, for household use, on July 15, 1911, and July 15, 1912, by cities and by firms.

Table I.—Retail prices of the principal articles of food on the 15th of each month, July and August, 1911, and July and August, 1912, by cities and by firms (pp. 41 to 113).—This table includes 39 of the most important industrial cities in the various sections of the United States. For each city prices are quoted for 18 principal articles of food. Prices

are quoted for July 15 and August 15, 1912, and for comparative purposes prices on the corresponding date in 1911 have been entered. When the 15th fell on Sunday or on a holiday the prices quoted were for either the 14th or the 16th of the month.

The 39 cities are arranged in alphabetical order, and under the various cities the 18 articles follow a uniform order, beginning with fresh meats. The particular grade or description of each article is shown in connection with the price quotations. Great care was taken to secure prices throughout the period covered for an article of as nearly uniform grade or quality as possible within each store, as changes in quality are, of course, reflected in prices.

Price quotations were secured from several firms in each city. In order to avoid identification, names of firms are not shown, but each firm has been given a number, which enables one to follow the prices quoted throughout the period for which a firm has been furnishing price quotations, either for the present report or for the preceding reports covering the period from 1907 to June, 1912.

Three articles are included in this table which are not carried into the tables showing relative prices of food; those articles are chuck roast, leg of lamb (yearling), and storage eggs.

Table II.—Bread weights: Scaling weight (weight of dough before baking), in ounces, of the principal brands of wheat bread on the 15th of each month, July and August, 1911, and July and August, 1912, by cities and by firms and brands (pp. 114 to 123).—This table shows the scaling weight in ounces of the principal brands of wheat bread in the cities covered by this report. The weights are quoted for July 15 and August 15, 1912, and for comparative purposes weights on the corresponding date in 1911 have been entered. When the 15th fell on Sunday or on a holiday, the weights quoted were for either the 14th or the 16th of the month.

Weight quotations were secured from several representative bakeries in each city. In order to avoid identification, names of firms and brands are not shown, but each firm has been given a number and each brand reported by a firm has been designated by a letter.

Table III.—Per cent of increase or decrease in retail prices of the principal articles of food: Price on the 15th of July and of August, 1912, compared with price on the corresponding date in 1911, by cities and by articles (pp. 124 to 130).—This table shows for each of the 39 cities the per cent of increase or decrease in price of each of 15 principal articles of food. The price on July 15, 1912, is compared with the price on July, 15, 1911, and the price on August 15, 1912, is compared with the price on August 15, 1911. No relative prices are shown for 3 articles for which actual prices are quoted in General Table I. These articles are chuck roast, for which quotations were not secured prior to January, 1912; leg of lamb, which is the article generally known

to the trade as "yearling," but the age of the sheep varies, as reported by some firms, with different seasons of the year; and storage eggs, for which only a comparatively few quotations were secured prior to January, 1912.

In order to arrive at the average per cent of change in the price of an article for each city, the percentage of change was computed from the prices quoted by each dealer, the percentages for the various firms added, and this sum divided by the number of firms reporting for the city.

Table IV.—Relative retail prices of the principal articles of food, January, 1911, to August, 1912, by geographical divisions (pp. 131 to 138).—This table shows for each of 15 principal articles of food the relative price for each month from January, 1911, to August, 1912. Relative prices are not shown for chuck roast, leg of lamb, and storage eggs, for reasons stated in the explanation of Table III.

Data corresponding to that shown in this table are presented for each year from 1890 to 1911 in general Table II, in Bulletin No. 105, Part II.

As explained on a previous page, a relative price, or an index number, as it is technically called, of any article is the per cent which the price of that article at any certain date is of the price of the same article at a date or period which has been selected as the base or standard.

The base selected for this compilation of retail prices is the average price for the 10-year period, 1890 to 1899. This base period is the same as was used in the preceding Bulletins on retail prices and wages and hours of labor and in the several presentations of wholesale prices in the Bulletins of this Bureau. The average for the 10-year period is used as the base for the reason that an average price for a number of years more nearly represents average or normal conditions than does the price for a single year, because of unusual conditions that may prevail in any one year.

The value of the relative price is that it enables the reader to follow more readily the course of prices of a single article and, when these relative prices are combined, to follow the course of prices of groups of articles. The relative price also permits the continuation of a price series when for any reason quotations from one firm are discontinued and quotations from another firm for a different quality or brand of article are secured instead, which article, though differing somewhat from the one formerly quoted, equally well represents the trend of the general market.

The many changes in firms furnishing prices and also the changes in grades and brands of articles make several steps necessary in order to arrive at the relative price of an article for a geographical division or for the United States. The methods followed during the

years 1890 to 1911 are explained in the Report on Retail Prices, 1890 to 1911 (Bulletin 105), and the reader is referred to that report. The method followed for July and August, 1912, is exactly the same as that for the years 1904 to 1911, excepting that monthly quotations instead of averages for the year are compared, firm by firm.

The 39 cities for which prices were secured have been grouped into five geographical divisions as follows:

North Atlantic division:

Boston, Mass.
Buffalo, N. Y.
Fall River, Mass.
Manchester N. H.
Newark, N. J.
New Haven, Conn.
New York, N. Y.
Philadelphia, Pa.
Pittsburgh, Pa.
Providence, R. I.
Scranton, Pa.

South Atlantic division:

Atlanta, Ga.
Baltimore, Md.
Charleston, S. C.
Jacksonville, Fla.
Richmond, Va.
Washington, D. C.

North Central division:

Chicago, Ill.
Cincinnati, Ohio.
Cleveland, Ohio.

North Central division—Concluded.

Detroit, Mich.
Indianapolis, Ind.
Kansas City, Mo.
Milwaukee, Wis.
Minneapolis, Minn.
Omaha, Nebr.
St. Louis, Mo.

South Central division:

Birmingham, Ala.
Dallas, Tex.
Little Rock, Ark.
Louisville, Ky.
Memphis, Tenn.
New Orleans, La.

Western division:

Denver, Colo.
Los Angeles, Cal.
Portland, Oreg.
Salt Lake City, Utah.
San Francisco, Cal.
Seattle, Wash.

*Table V.—Retail prices of coal, for household use, on July 15, 1911, and July 15, 1912, by cities and by firms (pp. 139 to 154).—*This table shows prices of Pennsylvania anthracite coal, stove size; Pennsylvania anthracite coal, chestnut size; and bituminous coal in all the cities for which retail prices of food are shown, with the exception of Atlanta, Ga., Charleston, S. C., Portland, Oreg., and Scranton, Pa. Prices are quoted for July 15, 1912, and for comparative purposes prices on the corresponding date in 1911 have been entered. In some cities practically no bituminous coal is used for household purposes and in others practically no Pennsylvania anthracite coal is used. In a few cities Colorado coal is quoted and in one or two cities Welsh and other varieties of coal are quoted.

Prices are quoted for coal in ton lots, in half-ton lots, and in bushel lots, or 100 pound lots, when sold in small quantities. In connection with prices the number of pounds per ton, half ton, and bushel is also shown.

The price quotations were furnished by coal dealers in each city, who kindly responded to a request from the Bureau for this informa-

tion. In order to avoid identification, firm names are not shown, but each firm has been given a number which enables one to follow the prices quoted throughout the period for which a firm has been furnishing price quotations, either for the present report or for the preceding reports published in Bulletin Nos. 105 and 106. The prices quoted are for coal delivered to consumers, but do not include charges for storing ton or half-ton lots in cellar or coal bin where an extra handling is necessary, except as noted in connection with the price quotation.

The general tables follow:

GENERAL TABLES.

TABLE I.—RETAIL PRICES OF THE PRINCIPAL ARTICLES OF FOOD ON THE 15TH OF EACH MONTH, JULY AND AUGUST, 1911, AND JULY AND AUGUST, 1912, BY CITIES AND BY FIRMS.

ATLANTA, GA.

Firm number.	Commodity.	1911		1912

111	Do.....		.25	.25	(1)
114	Do.....	.20	.20	.20	(1)

¹ No quotation.

² The prices are for the article generally known to the trade as "yearling." The age of the sheep ("yearling") varies from approximately 9 to 18 months. Owing to the fact that, in some firms, the age varies considerably with different seasons of the year, no "relative" prices are computed for this article in this report.

TABLE I.—RETAIL PRICES OF THE PRINCIPAL ARTICLES OF FOOD ON THE 15TH OF EACH MONTH, JULY AND AUGUST, 1911, AND JULY AND AUGUST, 1912, BY CITIES AND BY FIRMS—Continued.

¹ No quotation.² The prices are for the article generally known to the trade as "yearling." The age of the sheep "yearling" varies from approximately 9 to 18 months. Owing to the fact that, in some firms, the age varies considerably with different seasons of the year, no "relative" prices are computed for this article in this report.

¹ No quotation.

² The prices are for the article generally known to the trade as "yearling." The age of the sheep ("yearling") varies from approximately 9 to 18 months. Owing to the fact that, in some firms, the age varies considerably with different seasons of the year, no "relative" prices are computed for this article in this report.

³ Description, "tub" or "print," not reported.

¹ No quotation.² The prices are for the article generally known to the trade as "yearling." The age of the sheep ("yearling") varies from approximately 9 to 18 months. Owing to the fact that, in some firms, the age varies considerably with different seasons of the year, no "relative" prices are computed for this article in this report.

¹ No quotation.² The prices are for the article generally known to the trade as "yearling." The age of the sheep ("yearling") varies from approximately 9 to 18 months. Owing to the fact that, in some firms, the age varies considerably with different seasons of the year, no "relative" prices are computed for this article in this report.

¹ No quotation.

² The prices are for the article generally known to the trade as "yearling." The age of the sheep ("yearling") varies from approximately 9 to 18 months. Owing to the fact that, in some firms, the age varies considerably with different seasons of the year, no "relative" prices are computed for this article in this report.

TABLE I.—RETAIL PRICES OF THE PRINCIPAL ARTICLES OF FOOD ON THE 15TH OF EACH MONTH, JULY AND AUGUST, 1911, AND JULY AND AUGUST, 1912, BY CITIES AND BY FIRMS—Continued.

¹ No quotation.² The prices are for the article generally known to the trade as "yearling." The age of the sheep ("yearling") varies from approximately 9 to 18 months. Owing to the fact that, in some firms, the age varies considerably with different seasons of the year, no "relative" prices are computed for this article in this report.³ The 1912 quotations for this article, for all firms except one, are for eggs known by a different trade designation from those quoted for 1907 to 1911, inclusive. The 1911 quotations, for all firms except one, are not therefore entered in this table for comparison.

TABLE I.—RETAIL PRICES OF THE PRINCIPAL ARTICLES OF FOOD ON THE 15TH OF EACH MONTH, JULY AND AUGUST, 1911, AND JULY AND AUGUST, 1912, BY CITIES AND BY FIRMS—Continued.

¹ The prices are for the article generally known to the trade as "yearling." The age of the sheep ("yearling") varies from approximately 9 to 18 months. Owing to the fact that, in some firms, the age varies considerably with different seasons of the year, no "relative" prices are computed for this article in this report.

² No quotation.

¹ The prices are for the article generally known to the trade as "yearling." The age of the sheep ("yearling") varies from approximately 9 to 18 months. Owing to the fact that, in some firms, the age varies considerably with different seasons of the year, no "relative" prices are computed for this article in this report.

² No quotation.

¹ The prices are for the article generally known to the trade as "yearling." The age of the sheep ("yearling") varies from approximately 9 to 18 months. Owing to the fact that, in some firms, the age varies considerably with different seasons of the year, no "relative" prices are computed for this article in this report.

² No quotation.

¹ No quotation.

² The prices are for the article generally known to the trade as "yearling." The age of the sheep ("yearling") varies from approximately 9 to 18 months. Owing to the fact that, in some firms, the age varies considerably with different seasons of the year, no "relative" prices are computed for this article in this report.

TABLE I.—RETAIL PRICES OF THE PRINCIPAL ARTICLES OF FOOD ON THE 15TH OF EACH MONTH, JULY AND AUGUST, 1911, AND JULY AND AUGUST, 1912, BY CITIES AND BY FIRMS—Concluded.

OMAHA, NEBR.

During the period covered by this report the loaf of bread commonly sold in this city for 5 cents weighed 16 ounces after baking, as determined by the city ordinance quoted below:

The weight of bread exposed or offered for sale in the city of Omaha is hereby prescribed, as follows: A single loaf of bread shall weigh when baked sixteen (16) ounces; a full, or double, loaf of bread shall weigh when baked thirty-two (32) ounces. Any person or persons exposing or offering for sale or making sale of any single loaf of bread weighing when baked less than sixteen (16) ounces, or exposing or offering for sale any full, or double, loaf of bread weighing less than thirty-two (32) ounces shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be fined in any sum not exceeding ten dollars (\$10) for each and every offense.
